

We provide and support cutting-edge business communications solutions through world-class partnerships, people and processes.

3D Networks is a leading systems integrator offering customised and integrated business communications solutions. Our expertise in both telephony and data networks allows us to offer clients a single point of contact for all integration projects, from analysis through to deployment and support of the network infrastructure throughout the region.

3D Networks is a subsidiary of the Singapore-based Planet One Pte Ltd. Planet One combines the expertise, strong partnerships and broad reach of its subsidiaries to offer multi-skilled, business-critical technology solutions. Planet One subsidiaries include 3D Networks, Planet PSG, Net ProActive Services and FCS Computer Systems. Planet One enjoys the support of more than 700 IT professionals across 35 locations serving key markets in Asia Pacific, Middle East, Europe and US.

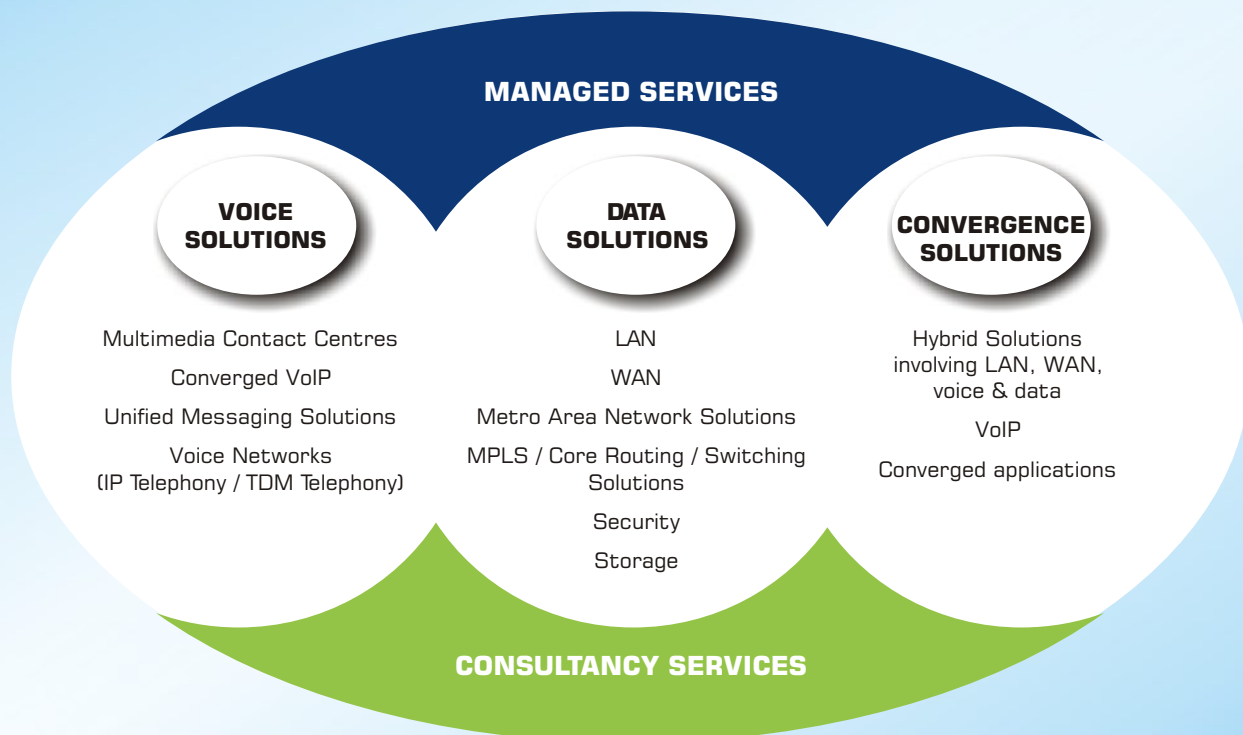

partnerships

3D Networks is the Global Customer Partner, Asia Pacific and sole pan-Asian Platinum Partner of Nortel

3D Networks has forged strong partnerships with world leaders. Our portfolio of solutions enables us to offer customers an enhanced selection of technologies for voice, data, converged networks, storage, security and managed services.

solutions portfolio

Integrated solutions for businesses:

Banking & Finance | Call / Contact Centres | Telecom | IT | Government | Education | Manufacturing | Retail | Hospitality | Health | Media

Voice & Data Solutions

3D Networks is a specialist in voice and data network integration offering businesses intelligent and innovative solutions in traditional and converged voice and data networks. Our portfolio includes unified messaging solutions, multimedia communications solutions with feature-rich applications and high-availability data networks for real-time / just-in-time information delivery, virtual teams, collaboration and mobility.

Managed Services

3D Networks offers the full spectrum of Managed Infrastructure and Security Services with flexible and selective outsourcing options. We have a range of business models that allow end customers as well as off-shore Managed Service Providers to take advantage of our ready talent, infrastructure and available technologies at a shared and fraction of the actual cost. Our mission is to make customers' everyday IT management simpler and bottomline healthier. So they can enjoy a consistent and reliable network, achieve faster time to market and ensure higher levels of customer satisfaction.

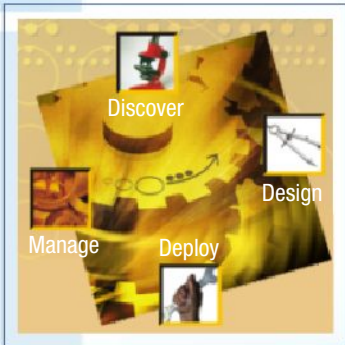

Security Solutions

3D Networks believes that by offering Security Solutions & Services as part of its 'Converged' portfolio, it can meet the demands of customers wanting to strike the right balance of seamless business operations and cost optimization. We bring together a team of certified security professionals and experts with the highest levels of pre-sales and engineering accreditation. With its rich experience in design, implementation and management of large security installations, the team is fully equipped to offer vendor-neutral solutions and services for medium to large-scale multi-discipline projects.

3DM Methodology for Consistent Implementation

3D Networks tried and tested 3DM methodology comprising of Discover, Design, Deploy & Manage helps us to formally determine customers' needs across the networking life cycle. It allows for standardised work practices, a seamless transition through the various phases of project management and results in the highest levels of service delivery.
